Job Description

We are seeking an experienced, registered Land Surveyor with the capabilities to technically manage our Land Surveying group in Moon Township, PA. Rhea performs boundary, ALTA, topographic, right-of way, transportation, and construction surveys using the latest equipment and surveying technology. Survey data is collected with conventional and GPS total stations and data collectors and processed with AutoCAD, MicroStation, and Open Roads software. We work on a full range of projects, including airports, local roads, interstate highways, and federal/state government sites.

The successful candidate will be able to lead the group in performing and documenting survey work and will mentor junior survey staff. They will also create and maintain client relationships, market the company's survey capabilities, prepare proposals with the goal of securing future work for the group, as well as assist the Survey group's administrative manager in his invoicing efforts.

Because we are a small, flexible firm that trusts and empowers our staff, we will help you develop professionally and we will look to you to help grow our surveying business through hard work, a commitment to quality, and a focus on client satisfaction. Approximate range for annual salary is \$80,000 to \$90,000, commensurate with experience.

Requirements:

- Responsive, Resourceful and Reliable, highly motivated, and detailed-oriented
- Licensed Professional Land Surveyor: PA license required; VA, WV, and/or OH license a plus. A minimum of 6 to 10 years of working experience is preferred.
- Experience with client relations, proposal development, and technical management required.
- Experience with oversight of survey aspects of civil and transportation engineering projects topographic and right-of-way surveys, boundary surveys, ALTA surveys, construction stakeout surveys, and as-built surveys.
- Experience surveying on airports a plus.
- Experience working on federal contracts/projects a plus.
- Demonstrated ability to coordinate, communicate with, and perform work concurrently for various outside clients and groups within the company.

- Demonstrated ability to effectively schedule and manage multiple field crews working independently and concurrently.
- Ability to perform QA/QC for survey computations and data collection as well as drafting and design performed by staff.
- Ability to prepare, sign, and seal survey and right-of-way plans, as required.
- Ability to prepare Technical and Price proposals for surveys.
- Familiarity with PennDOT ECMS system.
- Familiarity with and ability to operate Conventional Total Stations, Trimble Robotic Total Stations, GPS, and associated software, such as Trimble Access.
- Ability to travel for project scoping and project/crew oversight purposes. Must have and maintain a valid driver's license.
- Must be proficient with Office software suite, particularly Microsoft Word and Excel.
- Must demonstrate excellent communication skills.
- Must pass a drug screening and background check.
