

Licensed Land Surveyor | Nyce Construction, Sellersville, PA 18951

Pay: \$60,000.00 - \$100,000.00 per year

Job description: Licensed Surveyor / Survey Technician

Company: NYCE Construction Services, Inc.

Location: Sellersville, Pennsylvania – In-Person

Job Type: Full-Time

Salary: \$60,000 – \$80,000 per year (based on experience)

About Us

NYCE Construction Services, Inc. is a fast-growing civil construction company based in Sellersville, Pennsylvania. We specialize in infrastructure, site development, and construction support services throughout the region.

NYCE Construction Services is seeking a Licensed Professional Land Surveyor (PLS) to join our growing team. This is a key role supporting civil construction and site development projects across the region. This role supports both field and office operations and plays a key role in project planning and execution.

We will also consider a highly experienced Survey Technician with strong field and office capabilities.

All resumes should be e-mailed directly to Hailey Hollock, hailey@nyceconstruction.com.

Position Overview

The Licensed Surveyor will assist with survey data collection, site layout, and mapping for civil construction projects. The position requires strong technical skills, attention to detail, and the ability to work collaboratively with project managers, engineers, and field crews. This role provides an opportunity to work with modern surveying technologies and software while contributing to project planning, construction layout, and site documentation.

Key Responsibilities

Surveying & Field Operations

- Conduct **land and construction surveys** using GPS, total stations, and other surveying equipment
- Collect and analyze **topographic and site data** to support project planning and construction layout
- Perform **construction staking and layout** for infrastructure and site development projects
- Assist with **drone-based aerial mapping and GPS topography** where applicable
- Verify survey control points and ensure accuracy of collected field data

Survey Data & Mapping

- Process survey data and create maps, plans, and models using **2D and 3D engineering software**
- Review survey reports, site plans, and mapping data to support engineering and project teams
- Maintain organized survey records and documentation

Project Support

- Work closely with project managers and field teams to support **construction layout and project execution**
- Assist with **permit documentation and regulatory compliance** when required
- Provide survey data and insights that support **project planning, scheduling, and site logistics**

Required Qualifications

- Experience with **land surveying, construction layout, or survey data processing**
- Familiarity with **GPS surveying equipment and topographic data collection**
- Strong skills in **Microsoft Office**
- Excellent attention to detail, math skills, and organizational abilities

Preferred Qualifications

- **Active PLS license strongly preferred**
- Proven experience in land surveying and construction layout
- Strong technical, math, and data processing skills
- Ability to lead field operations and support office workflows
- Experience with civil/site development projects is a big plus
- Ability to work both **in the field and in the office**

Join our team and help shape the foundation of our projects through precision surveying and innovative technology. Apply today to join a team that values skill, precision, and collaboration. Build your career—and your future—with NYCE Construction Services, Inc.
